Our Mission

The goal of the Trinity Health Internal Medicine Residency program in Muskegon is to train highly skilled, compassionate and purposeful physicians in a diverse and cooperative environment. We strive to foster individuality, teamwork, service to the community and oneself, personal and professional integrity, and intellectual growth, resulting in exemplary physicians. Our program emphasizes integrity, respect and support for all, accountability, learning and continuous improvement.

Internal Medicine Residency

Serving the West Michigan Lakeshore

Graduate Medical Education

Opportunities

- Large, diverse patient population with complex conditions in a busy, inpatient hospital setting
- Multi-disciplinary rounding with a variety of specialties
- Freedom to choose electives in area of interest
- Faculty who are supportive, experienced and engaged to teach
- Competitive salary with excellent benefits, including health, CME and paid time off
- Brand new, state-of-the-art hospital
- Beautiful beachside locations in West Michigan
- Muskegon is known for sunny days on the water, spectacular fall colors and Olympic-style winter recreation

Program Overview

The Internal Medicine Residency program at Trinity Health began in July 2014 with five residents and has continued to grow every year since. The ACGME-accredited program is approved for seven well-qualified interns each year.

Our program offers a wide variety of internal medicine cases and services within a large geographic area where the population varies from rural to urban. The hospitalist service covers approximately 90% of all hospital admissions, of which the residents are intricately involved.
